

KAVITA K

PHP Developer | Laravel, CodeIgniter | REST APIs | AWS Cloud Deployment

+91-8968782537 | kavita.engineer6@gmail.com | India

PROFESSIONAL SUMMARY

PHP Developer, 10+ years, specializing in Laravel/CodeIgniter backend systems, RESTful APIs, and AWS-deployed applications for fintech, healthcare, and e-commerce clients.

- Led engineering teams of up to 6 developers across concurrent client projects, end to end.
- Built and optimized MySQL-backed PHP applications, REST APIs, and payment integrations (Stripe, PayPal, Authorize.Net, Razorpay).
- Deployed and scaled applications on AWS (EC2, S3); implemented authentication, authorization, and data protection across every role.

CORE COMPETENCIES & TECHNICAL SKILLS

Backend: PHP, Laravel, CodeIgniter, CakePHP, Core PHP (also: Node.js, NestJS)

Databases: MySQL, MongoDB, Redis, Query & Schema Optimization

APIs & Auth: REST APIs, SOAP, cURL, OAuth/Authentication, RBAC, Data Protection

Payments: Stripe, PayPal, Authorize.Net, Razorpay

Cloud & DevOps: AWS (EC2, S3) Deployment & Scaling, Docker, Linux, CI/CD

Tools: Git, GitHub, GitLab, Bitbucket, Jira

Additional: React.js, Next.js, Vue.js, WordPress, SugarCRM, Kafka/Microservices, AI/LLM API Integration

PROFESSIONAL EXPERIENCE

Senior Backend Engineer — Prolificrew

Oct 2024 – Present

- Develop and maintain secure, production-grade backend services using Node.js and NestJS, writing clean, reusable, and testable code for business-critical applications.
- Architect role-based access control (RBAC), authentication, authorization, and data protection mechanisms, strengthening application security and enforcing granular permission workflows.
- Design and maintain REST APIs and backend integrations with a focus on reliability, security, and horizontal scalability.
- Collaborate cross-functionally with front-end developers, DevOps, and product teams to ship API-driven features, improving release velocity and reducing handoff friction.

Technical Lead — Nablasol Digital Services, Delhi

Apr 2022 – Sep 2023

- Led backend development for Node.js applications and SugarCRM-based enterprise solutions, overseeing delivery across multiple concurrent projects.
- Customized CRM modules, workflows, and APIs to support customer and sales operations, improving process efficiency for business teams.
- Directed engineering activities and conducted technical reviews, ensuring code quality, architectural consistency, and on-time delivery.
- Owned API integrations, authentication design, and data workflows, improving data reliability across connected systems.

Software Developer — Henceforth Solutions, Mohali

Jan 2021 – Mar 2022

- Built backend services using Node.js and NestJS for scalable web applications, implementing core business logic and API endpoints.
- Implemented authentication, authorization, and role-based access control, strengthening application security posture.

- Integrated third-party services and managed database workflows to support reliable data exchange across systems.
- Diagnosed and resolved production issues, improving backend performance and reducing system downtime.

Senior Software Engineer — Closeloop Technology, Mohali

May 2018 – Nov 2020

- Managed and mentored engineering teams of 2–6 developers across multiple concurrent client projects, coordinating technical delivery end to end.
- Developed backend applications and REST APIs using PHP, Laravel/CodeIgniter, Node.js, and MySQL for a diverse client portfolio, deploying and scaling select applications on AWS.
- Designed API services, third-party integrations, and authentication workflows underpinning scalable, database-driven features; optimized MySQL queries to improve application performance.
- Partnered directly with clients to translate business requirements into technical solutions, strengthening stakeholder relationships.

Web Developer — Smart Data Enterprises (I) Ltd, Mohali

Apr 2014 – Mar 2018

- Delivered end-to-end web applications spanning e-commerce, healthcare, and payment systems, from requirements through production.
- Developed PHP/MySQL applications and integrated third-party services and payment gateways, enabling secure online transactions.
- Built and maintained core business workflows and customer-facing features, writing clean, reusable code to support day-to-day platform operations.
- Optimized MySQL database queries and improved transaction workflows through backend performance tuning, enhancing reliability and overall user experience.

PHP Trainee — ADI Professionals, Mohali

Jan 2013 – Apr 2014

- Developed foundational PHP applications using PHP, HTML, CSS, and MySQL, including authentication modules and core CRUD functionality.
- Supported website development, debugging, and database operations, building a strong foundation in full-stack web fundamentals.

SELECTED PROJECTS

CTAX CRM — Financial & Billing Automation / SugarCRM, CodeIgniter, DocuSign, Authorize.Net, AWS S3

- Automated data ingestion, billing, invoice generation, and digital document-signing workflows for a financial services platform.
- Integrated secure online payments and document management services, streamlining end-to-end billing operations.

PaceFunding / Home Run Financing — Loan & Financing Platform / CakePHP, WordPress, REST APIs

- Developed backend services supporting energy-saving loan products and end-to-end financing workflows.
- Integrated REST APIs and third-party services to support core business operations.

CheckInMD — Healthcare Appointment Platform / Laravel, Twilio SMS API, Facebook API

- Built patient check-in and appointment management functionality for a healthcare scheduling platform.
- Implemented automated SMS notifications and third-party API integrations to reduce missed appointments.

Echo Limousine — Transportation Booking Platform / CakePHP, WordPress

- Developed backend APIs for limousine booking, airport transfers, and chauffeur dispatch workflows.
- Implemented reservation, dispatch, pricing, and ride-tracking functionality.

EDUCATION

- Master of Computer Applications (MCA) — Punjab Technical University, 2011
- Bachelor of Computer Applications (BCA) — Punjab Technical University, 2008
